*"Wherever the art of Medicine is loved, there is also love of Humanity"*  
Hipócrates

## **EXPLANATION & PHILOSOPHY**

**CATENA FROM LATIN, CATENA,  
/ka'te:.na/**

Circular object formed by interlaced links. Intangible bond that unites people. Succession of related facts or phenomena.

Consequently, we are able to satisfy 100% of our customer's needs through our networks of contacts, control, dedication and engagement in every operation.

# **ABOUT US**

CATENA GROUP provides complete and vertical services, we act as a key link for all our clients as well as offering to obtain various benefits in their purchases. Such as simplification of procedures through the know-how of our company, relationships and experience in the different sectors that we are specialized in, these are just some of the unique advantages on collaborating with us.

**CATENA MEDICAL SERVICES** operates mainly as a purchasing center (not as a distributor) for Governments and State or Private Companies.

We are specialists in providing solutions to our client's requirements.

We provide all of the services to facilitate our client's work with first level laboratories from countries such as France, Germany, Greece, Italy, Spain, etc. We assist them by handling the negotiations in order to achieve their target prices and orders, simplify document management and provide logistics and legal support if required, etc.

Subsequently, our work with more than 778 references of generic medicines (including Food Supplements, Vitamins, Women's hygiene products, etc.) and more than 30 top-level laboratories, one of the key unique advantages of working with us is our ability to adapt the research of our team, in order to provide the most interesting products with competitive prices, conditions, stabilities or requirements that each country requests.

*"Medicine is the only universal profession that everywhere follows the same methods, acts with the same objectives and seeks the same ends"*

Sir William Osler

## SELECTION OF SUPPLIERS

Detailing further the benefits that you can obtain from us:

As the purchasing center, we work with the product requirements of our clients and suggest other attractive products highly consumed in the market with a considerable price improvement, in order to achieve a large market share.

### 1 Select

potential manufacturers from our existing portfolio.

### 2 Evaluate

the manufacturers' presence in the target country and the available products to register.

### 3 Identify

additional products that present a high potential for the clients' market (according to local requirements) and that are not exclusive to other local companies.

### 4 Determine

which laboratories are within the target price and desired commercial conditions in order to obtain the product exclusivity.

# SERVICES

## NEGOTIATIONS

According to the target price and forecast specified, our team will negotiate with our vast portfolio of pharmaceutical manufacturers the price, supply conditions and register of a trademark from the laboratory or an MDD (made to measure) for the client. The registration should always be made by the client.

## ORDER MANAGEMENT

In order to provide our clients with a unique selling point, we act as the purchasing centre, managing the orders, hence generating efficiency and preventing potential inaccuracies.

## CONTROL & DOCUMENTATION MANAGEMENT

We facilitate the processing of the customer needs with the laboratories for the registration of products in the Ministry of Health or competent authority and all the necessary documentation.

# SERVICES

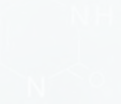

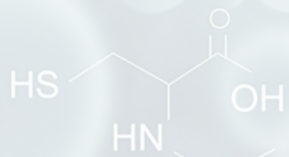

## LEGAL SUPPORT

We offer the support of negotiating or adapting, on the clients behalf, the most compelling agreements. This process helps to accelerate the purchase and protect the clients' interests.

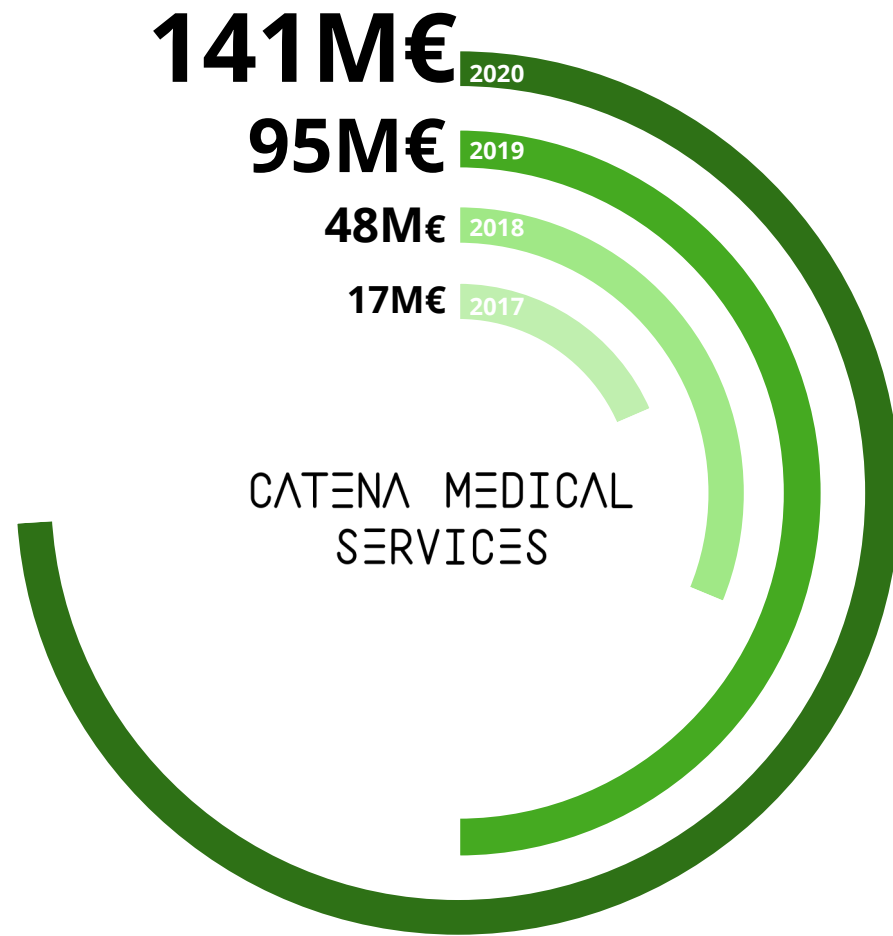

## LOGISTICS MANAGEMENT

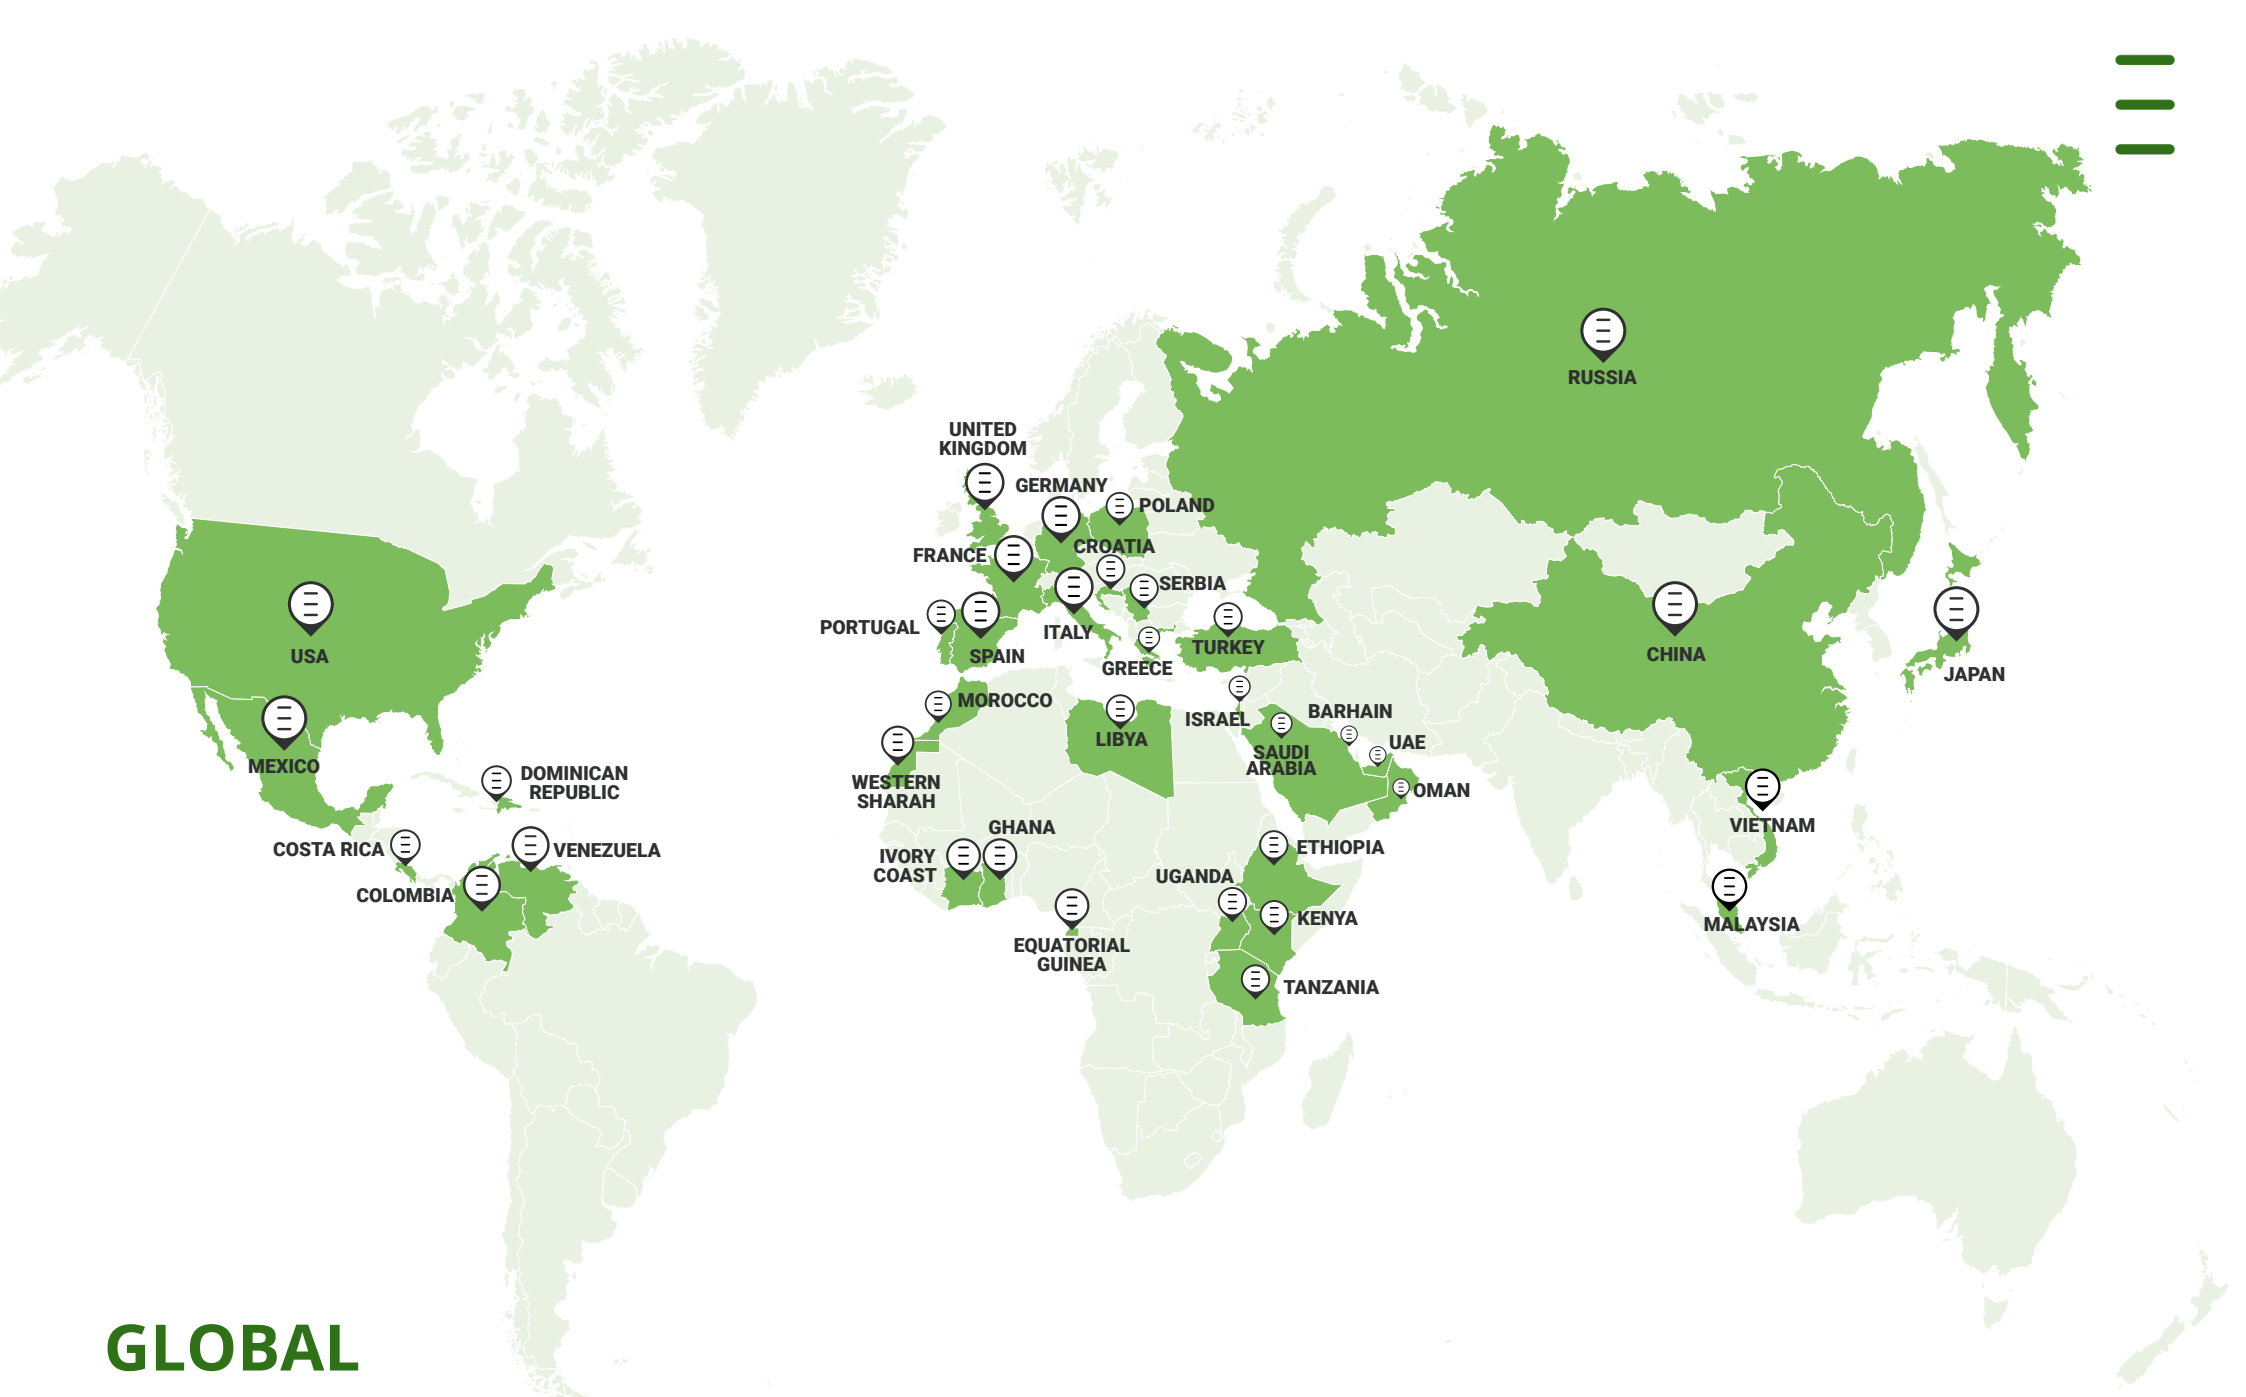

We can provide assistance to our clients, offering a wide variety of competitive logistics solutions through sea, road or air.
